† Includes 10 percent of single premiums

* Excludes $113.3 million of corporate-owned life insurance premiums reported in the first eleven months of 1987 and $205.8 million reported in the first eleven months of 1988

# About the Survey

This survey gives ordinary sales results of a group of companies that report three measures of sales performance — face amount (volume), annualized premiums, and number of policies. From these data, premium per $1,000, average size policy, and premium per policy, as well as trends in those statistics, are derived. Sales results by product are also shown for a subset of the contributing companies.

The definition of new sales excludes revivals, indexed increases, dividend additions, reinsurance acquired, credit insurance (coverage of obligations not exceeding 120 months' duration) and products without insurance (such as annuities). The data include mass-marketed ordinary business.

The ordinary results are based on the experience of 126 companies — and their 53 subsidiary companies — operating in the United States. These contributors represent 59 percent of the 1986 United States ordinary volume sold. Since no industry data are available on total annualized new ordinary premiums, the proportion of total premiums represented by these contributors cannot be determined. The business of these contributors may not represent the industry proportions of participating and nonparticipating policies and of term and permanent insurance sold; therefore, statistics (such as premium per $1,000) derived from the experience of the contributors may not represent the experience of the industry as a whole.

The survey also provides group sales volume and annualized premiums under new or amended contracts. These results are based on the experience of 49 companies plus 4 subsidiaries operating in the United States. These contributors represent 63 percent of the 1986 United States volume of new or amended group contracts.
